

Dicamba Training & Weed Management Update

February 15, 2018
Moran Community Center
409 Cedar St.

Moran, Kansas
9:00 am – 11:30 am

Dicamba Training

As we embark on the 2018 growing season, producers should be aware that dicamba herbicides Engenia, FeXapan, and XtendiMax are classified as Restricted Use Pesticides (RUPs). In order to be able to purchase these herbicides, you must possess either a private applicator license or a 1A (Agriculture Plant) commercial applicator license.

In addition, these products have additional label restrictions when applying. An applicator must attend specific auxin inhibitor (dicamba) training in order to apply these products in the field for 2018. In Kansas, these trainings will be sponsored by K-State Research and Extension, as well as industry representatives from BASF, Dow/Dupont and Monsanto. It will be the responsibility of the applicators to obtain this training before the application of these herbicides.
