

Landscaping for Hummingbirds

Thursday, March 22, 2018
6:00 pm

Yeager Building
Bourbon County Fairgrounds

Feeding hummingbirds is one of the fastest growing summer backyard activities. Watching them hover to feed and spar with other hummingbirds for feeder space is fascinating and fun! You can enhance the attractiveness of your yard to hummingbirds, and other birds, through the appropriate use of landscaping materials including trees and shrubs as well as annual and perennial flowers. Learn more at this educational workshop.

About the Speaker

Chuck Otte has been the Geary County Extension Agent since 1982. As an avid birder and naturalist, Chuck spends considerable time in activities with organizations that foster support, outreach, and knowledge of the natural world. Chuck is the co-author of "Birds in Kansas" as well as "A Pocket Guide to Common Kansas Backyard Bird."

Program Topics

- Hummingbirds in Kansas
- Feeding and nesting needs
- Enhancing activity at feeders
- Plant material recommendations
